to your doorstep

Temperature-controlled Consolidation Services for Wine

INTERNATIONAL TRANSPORT DIVISION

We keep fine wines in great shape

Wines are delicate from the inside out. That's why we're dedicated to giving them the best treatment from the start. OTS Australia Pty Ltd, in partnership with OTS Italy, offers temperature-controlled consolidation container services. To bring wines from Europe straight to you, without altering them in transit.

This means a sip of your wines still transports you back to Italy, France, Spain, Switzerland, Austria, Germany, Hungary and further. Because although our container services leave from Milan (via Genova) to Melbourne/Sydney, our services extend beyond the Italian wine export market, into Western and Eastern Europe. And thanks to our consolidation services, you can import small quantities of wine (minimum a euro pallet equivalent to 80 cartons / 480 bottles) from the European wineries of your choice, without worries. Whether you run a restaurant with a sophisticated wine cellar, a boutique with a taste for European wines, or a small wine import business, enjoy the many benefits that our temperature-controlled consolidation container services offer:

- ▶ Place small sample orders freely, choose your own labels, and source for wine directly from European wineries
- ▶ Protect your wines in a temperature-controlled travel environment
- ▶ Receive your wines in good time with fast, direct transits into Melbourne/Sydney and overnight trucking distribution services to any Australian destination
- ▶ Store and distribute your wines with bonded warehouses in Melbourne/Sydney/Brisbane through our subsidiary company OTS Plus Pty Ltd

WAREHOUSING & DISTRIBUTION DIVISION

OTS Plus Pty Ltd

Offering comprehensive warehousing and distribution services in the wine and alcohol industry, OTS Plus was developed so the OTS Group in Australia can provide a one-stop, in-house solution for wine and alcohol customers.

Our state-of-the-art stock delivery management systems provide all the efficiency, visibility and reporting benefits you expect and more, allowing your business more time to focus on the most important part: our customers.

OTS Plus services include:

- ▶ Licensed 79G bonded warehousing and excise storage
- ▶ Free store warehousing
- ▶ Australia-wide transport to wholesalers and retailers
- ▶ Pick/pack, cross docking, labelling and product re-working
- ▶ Contract warehousing
- ▶ Inventory management

Contact us today and take advantage of the OTS Plus experience – we are the Home of Logistic Solutions for the wine and alcohol industry.

CONSOLIDATION OF LCL WINE SERVICES

Thermal blanket, strong, durable and affordable

The EnviroTuff Liner (ETL) is a patented thermal liner designed to protect wine and other goods during transport. This is achieved by creating an environment that significantly reduces the rate at which temperature fluctuates thus not allowing the dew point to be reached.

Both these climatic conditions cause products to be exposed to severe extremes e.g. product separation, packing damage causing premature ageing of wine and shelf life.

The ETL has been designed for 20/40 foot containers, airfreight and pallet covers.

How does the EnviroTuff Liner work?

The ETL is fully woven reflective liner that allows for forklift, hand or slip-sheet loading. Once loaded it is fully sealed providing a closed off temperature controlled environment of the Goods inside. Over 90 – 95% of the temperature trying to penetrate the ETL is reflected as is temperature inside which is trying to escape.

Details: 850lbs / 385kg 386 Liters Saline
Pallet Size: 40" x 48" x 48"
Container Used: CoolLiner Pallet Cover
Container Compared to: Outside Ambient Temperature
Weight Shipped: 900lbs
Pre-shipment Temperature: 65°F
Refrigerant Used: None
